PROFILE

Full Stack Developer with hands-on experience in React, Flask, and MongoDB. I modernized a large React code base from 16.8 to 22 and built clean, scalable APIs and UI dashboards that users loved. I thrive on solving real problems, writing clean code, and shipping fast. Skilled in front-end architecture, back-end integration, and making products better with every commit.

EMPLOYMENT HISTORY

Full Stack Developer at Sivive Enterprise Solutions Private Limited

August 2024 — Present

- Resolved critical front-end bugs and implemented dynamic pages using React, fetching data via Python (Flask) APIs. Built and integrated Restful APIs using Flask with MongoDB as the data store.
- Led the migration of the React code base from version 16.8 to 22, enhancing performance and adopting modern React features.
- Developed clean and responsive UI for various pages, including a data-eccentric dashboard with organized presentation and real-time updates.

Research And Development Intern at Lumos Learning, Bengaluru, Karnataka, India

January 2022 — September 2022

- Developed and implemented new features in student portal to enhance user engagement.
- Designed 'Flashcube' tool to improve memory retention and learning efficiency.
- Collaborated with cross-functional teams to gather requirements and optimize user experience.

EDUCATION

Bachelor of Technology - BTech in Computer Science at Jain (Deemed-to-be University)

January 2018 — January 2022

- Gained hands-on experience through practical labs, coding assignments, and real-world tech projects.
- Organized junior orientation events and actively contributed to university life through Chess Club and Acting Club.

HOBBIES

Playing chess, video games, dancing and reading books
